DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art does not disclose a rotating body control device comprising: first phase matching means of Z phase detection type successively energizing a rotating body for each of a plurality of phases of the rotating body, the rotating body is rotated by the energization and resultant excitation for each of the plurality of phases, for obtaining, when a Z phase output of an encoder detecting a rotational angle of said rotating body is rendered on, a correspondence between a count value calculated from an output signal of said encoder and the energized phases; and second phase matching means of Z phase non detection type successively energizing, when an abnormality in encoder output is detected under control by said first phase matching means, the rotating body for each of said phases for a period of time in which said rotating body can rotate in accordance with the energized phases, for obtaining, when the rotating body is no longer energized, a correspondence between a count value calculated from an output signal of said encoder and the energized phases.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
